SUMMARY

Full Stack Software Engineer with experience building scalable web applications, cloud-native services, and AI-powered solutions using Node.js, React, TypeScript, Java, and Python. Experienced in designing and deploying applications on Google Cloud, integrating LLM-based features with Vertex AI, and delivering production-ready software in international Agile teams. Fluent in English, Spanish, and Portuguese.

TECHNICAL SKILLS

Languages: JavaScript • TypeScript • Java • Python

AI: Google Vertex AI • Gemini API • LLM Integration • Prompt Engineering • AI-powered Applications

Frontend: React • Next.js • HTML5 • CSS3

Backend: Node.js • Express • Quarkus • REST APIs • Microservices • Webhooks

Cloud & DevOps: Google Cloud Platform • Cloud Run • Docker • Git • GitHub Actions • CI/CD

Databases: PostgreSQL • MongoDB • MySQL

Methodologies: Agile • Scrum

EXPERIENCE

Full Stack Software Engineer & Technical Lead

Dec 2025 – Present

Land IT – TryEvo

- Lead the development of an AI-powered recruitment platform used to automate candidate evaluation and hiring workflows.
- Designed and implemented scalable backend services using Node.js, Express and MongoDB.
- Developed modern user interfaces with React and TypeScript.
- Integrated Google Vertex AI to automate interview transcription, candidate analysis and conversational AI features.
- Built cloud-native services deployed on Google Cloud Run using Docker and automated deployments with GitHub Actions.
- Implemented real-time communication using Server-Sent Events (SSE).
- Worked closely with product stakeholders to define requirements and deliver features in Agile sprints.

Full Stack Software Engineer

Jun 2023 – Nov 2024

Bosch

- Co-developed the open-source Visual Studio Code extension ELF-Ripper, used by over 1,900 engineers to analyse ELF binaries and visualise static memory allocation.
- Designed and implemented backend services using Java (Quarkus) and REST APIs for IoT and robotics applications.
- Developed responsive frontend features with React, Next.js and TypeScript for internal engineering tools.
- Collaborated with international cross-functional teams following Agile/Scrum methodologies.
- Participated in code reviews, testing and continuous integration to maintain software quality and reliability.

Freelance Full Stack Developer

Jul 2025 – Jan 2026

Pérola Humana

- Refactored and maintained the company's website, improving performance, SEO and accessibility.
- Managed hosting infrastructure, domains and business email services.
- Implemented multilingual support and ensured reliable production deployments.

PROJECTS

ELF-Ripper VS Code Extension <i>VS Code Extension, Firmware Analysis, ELF Binaries</i>	Jun 2023 – Nov 2024
• Open-source Visual Studio Code extension used by more than 1,800 firmware engineers to analyse ELF binaries and visualize static memory allocation. Built during my time at Bosch and published on the VS Code Marketplace. • Link: GitHub Repository	
AI-powered Recruitment Platform <i>React, Node.js, Google Cloud, Vertex AI</i>	Dec 2025 – Present
• Combining React, Node.js, Google Cloud and Vertex AI to automate interview transcription, candidate evaluation and recruitment workflows. • Link: Live Platform	

EDUCATION

Training Service of Ciriaco Cardoso	04/2025
<i>Advanced Python (NQF Level 5)</i>	11/2025
